

TriNetX South Korea Network

ACCESS THE FASTEST GROWING SOURCE
OF REAL-WORLD PATIENT DATA IN ASIA

Access real-world South Korean patient data

Rapidly growing source of robust and continuously refreshed de-identified South Korean clinical data.

Conduct region-specific studies compliant with local privacy regulations

Identify sites in South Korea that have eligible patients based on real-time data. Understand the impact of inclusion/exclusion criteria on protocol design and feasibility.

Gain a path to real patients in South Korea

Have a path back to the identity of the patient if the healthcare organization decides to participate in your trial.

TriNetX South Korea Network

TriNetX continues to grow its world-wide sources of patient data with access to a rapidly expanding data set of real-world data from patients in South Korea. The country ranks sixth globally for randomized clinical trials (RCTs) and the continued government investment in infrastructure, global standards, and regulations makes South Korea increasingly attractive for pharma interested in protocol design and feasibility, site selection, and patient identification for recruitment.

The TriNetX South Korea Network provides access to a robust, continuously refreshed data source of de-identified EMR data of more than 36 million patient lives from 27 hospitals.

Generating a South Korea Report

Using the TriNetX self-service user interface and best practice guidelines for querying South Korean data, you define the specific disease and population parameters of your query. Through the TriNetX platform, you submit your request and the TriNetX clinical sciences team generates the report which details the HCOs that have patients for the exact population you seek.

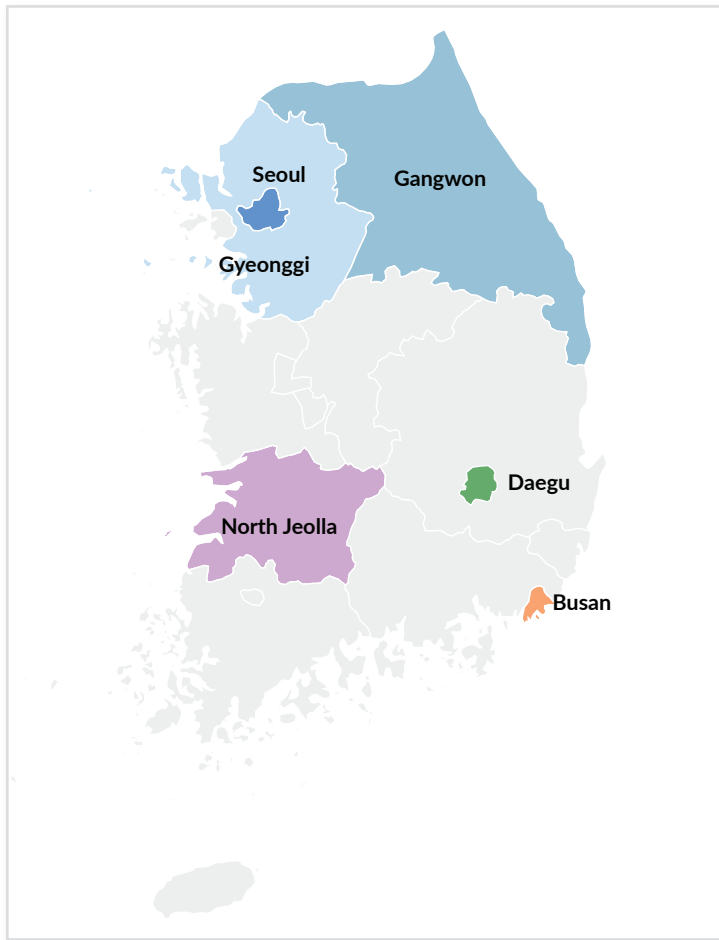

PIPA Compliant

All access to data through the TriNetX South Korea Network is de-identified and compliant with South Korea's Personal Information Protection Act (PIPA).

Key Features of the TriNetX South Korea Network

Site List & Patient Location

Every report includes a map and table detailing the healthcare organization and number of patients that meet the query criteria.

Integrated with TriNetX Trial Connect

Directly engage the right contacts at the right healthcare organizations quickly and easily, and centrally monitor site acceptances, declines, and pending responses.

Trial Details					
All Sent	2	Pending	2	Interested	0
Not Interested		0			
Sample Query			Study Status	Therapeutic Area	Indication
			Study Feasibility	Pulmonology	Test
			Sent On Nov 07, 2018 a year ago		
Response Date	Status	HCO Name	Number of Patients	Last Viewed	Additional Information
	Pending	Healthcare Organization D	110	Nov 27, 2019	
	Pending	Healthcare Organization B	540	Nov 27, 2019	

Query Execution Summary

Each report includes a query summary that includes specifics on how the analysis was conducted, including how the patient cohort was defined, how and what criteria was grouped into events, and what data types were available.

MUST Have		CANNOT Have	
Search Term...		Search Term...	
#11 Type 2 diabetes mellitus	4,233,859	CV702 LOOP DIURETICS	2,233,388
AND #6009 Insulin Lispro	1,047,386		
AND #937 Hemoglobin A1c/Hemoglobin.total in Blood	5,189,846		
Event 1A			
Add terms		#09 Drug or chemical induced diabetes mellitus 283,022 OR #10 Type 1 diabetes mellitus 620,566 OR #13 Other specified diabetes mellitus 394,527 OR #08 Diabetes mellitus due to underlying condition 321,404	
Event 2A			
Add terms		#084 BMI Percentile 762,037 OR #61.41 Body mass index (BMI) 40.0-44.9, adult 435,277	

Criteria Analysis for Protocol Feasibility

A patient funnel provides insights into feasibility by outlining which I/E criteria are most limiting.

Analyze Criteria	Exclude HCOs with 0 patients	Criteria Impact	Most to least	Least to most
Network		Patients	50,732,114	HCOs 40
Base Population	See All	Patients	254,381 (-99%)	HCOs 36
Population Any age / Any sex		Patients	254,381 (0%)	HCOs 36
Event 1A The terms in this event occurred at any time. Cannot Have: #09 Drug or chemical induced diabetes mellitus OR #10 Type 1 diabetes mellitus		Patients	157,289 (-38%)	HCOs 36
Event 2A The terms in this event occurred at any time. Cannot Have: #084 BMI percentile OR #61.41 Body mass index (BMI) 40.0-44.9, adult		Patients	147,614 (-6%)	HCOs 36
		147,614	Patients	36
				HCOs

About TriNetX, Inc.

TriNetX is the global health research network that optimizes clinical research and enables discoveries through the generation of real-world evidence. TriNetX combines real-time access to longitudinal clinical data with state-of-the-art analytics to answer complex research questions at the speed of thought. The TriNetX platform is HIPAA and GDPR compliant. For more information, visit www.trinetx.com or follow @TriNetX on Twitter.
